In the EGM the honorable shareholders approved Rights Offer of 5,23,35,028 Ordinary Shares at an offer price of Tk.10.00 each on the basis of 1(one) rights share for every 1 (one) existing share held on the record date.

RISK FACTORS AND MANAGEMENT'S PERCEPTION ABOUT THE RISKS**Interest Rate Risk**

Interest rate risk is the risk that company faces due to unfavorable movements in interest rates. Changes in the government's monetary policy along with increased demand for loans/investments tend to increase the interest rates. Such rises in interest rates mostly affect companies having floating rate loans or companies investing in debt securities.

Management Perception:

The management of the Company is always aware of the interest rates at which the debts of the company are being financed. Management finances long-term funds using fixed interest rate debt and finances short-term funds at reasonable competitive rates. The company has been repaying borrowed funds on a continuous basis to reduce such interest risk.

Exchange Rate Risk

Exchange rate risk occurs due to changes in exchange rates. As the Company imports equipment and Raw materials of Aluminium Profiles from abroad. Unfavorable volatility or currency fluctuations may affect the profitability of the Company.

Management Perception:

The exchange rate of US Dollar against BDT in the country has traditionally witnessed upward trends, and appreciation of local currency against US Dollar will reduce the import cost of the Company.

Industry Risks

Industry risk refers to the risk of increased competition from foreign and domestic sources leading to lower prices, revenues, profit margins, market shares etc. which could have an adverse impact on the business, financial condition and results of operation.

Management Perception:

The company continuously carries out research and development (R&D) to keep pace with the customer choices and competitive prices.

Market Risks

Market risk refers to the risk of adverse market conditions affecting the sales and profitability of the company. Mostly, the risk arises from falling demand for the product or service which would harm the performance of the company. On the other hand, strong marketing and brand management would help the company increase their customer base.

Management Perception:

The company has set its focus on the Domestic market. The management is trying to sell through direct contacts with the existing customers in selected regions by understanding their needs.

Technology Related Risks Potential

Technology always plays a vital role for each and every type of business. Better technology can increase productivity and reduce costs of production. Firms are exposed to technology risks when there are better technologies available in the market than the one used by the company which may cause technological obsolescence and negative operational efficiency.

Management Perception:

The Company is aware of technological changes and has adopted new technology according to its needs. Furthermore, routine and proper maintenance of equipment's carried out by the company ensures longer service life for the existing equipment and facilities.

Potential or Existing Government Regulations

The Company operates under the Company's Act 1994 and other related regulations, Income Tax Ordinance 1984, Income Tax Rules 1984, Customs Act, 1969, Value Added Tax (VAT) Act and rules 1991. Any abrupt changes of the policies made by the regulatory authorities may adversely affect the business of the Company.

Management Perception:

Unless any adverse policies are made, which may materially affect the industry as a whole; the business of the Company will not be affected.

Changes in Global or National Policies

The performance of the Company may be affected due to unavoidable circumstances both in Bangladesh and worldwide, such as war, terrorism, political unrest in the country.

Management Perception:

The Company has different level of customers across the country to reduce the risk.

History of Non-Operation, if any

The company does not have any history of non-operation.

Operational Risks

Non-availabilities of materials/equipment/services may affect the smooth operational activities of the Company. On the other hand, the equipment may face operational and mechanical failures due to natural disasters, terrorist attacks, unforeseen events, lack of supervision and negligence, leading to severe accidents and losses.

Management Perception:

The compensation as well the benefit package will restrain the employees to leave their assignment and go for any employee movement for higher benefit packages. The Company is equipped with power backup and security systems, which reduce operational risk. Besides, the equipment is under insurance coverage in order to get reasonable compensation for any damages.

DATE OF OPENING AND CLOSING OF SUBSCRIPTION

LENGTH OF TIME DURING WHICH THE ISSUER HAS CARRIED ON BUSINESS [Rule-8(j)]

Bangladesh Thai Aluminium Limited is a public limited Company carries its commercial operation for the last 36 (Thirty Six) years.

HIGHLIGHTS OF THE COMPANY

EXECUTIVE SUMMARY

Bangladesh Thai Aluminium Limited [hereinafter BTA is an ISO 9001: 2000 certified aluminium extrusion and anodizing company. It is the pioneer company in the aluminium market of Bangladesh. It was set-up by its founder Chairman (Late) Col. A. Maleque with a patriotic zeal to protect the wood resources and generate employment in the country back in 1979 initially as a fabrication industry. Later, in 1990 - 1992 the main industrial unit was set-up. BTA produces the best quality aluminium profiles for doors, windows and other purposes. Only BTA has a balanced production facility in aluminium industry in Bangladesh, facilitating in-house casting, extruding, anodizing, die making, powder coating of aluminium profiles. BTA also fabricates different items like doors, windows, partitions, ladders etc. Top quality product of BTA has always given the company a very strong reputation and brand image as a result the company earned very good profit every year. The brand name became so strong that it became the product name in the local market within a short period of time and occupied almost 50% of the market share.

The efficient management of BTA, consisting of technical and managerial experts, took the company to a position from where it received many local and international awards. The company also created its export market. Gradually the market, created by BTA, expanded and within 6-7 years' time few foreign companies entered into the market with foreign investment and started to give products on credit in the local market. Moreover they lowered the market price and gave credit in the market at a time when there was worldwide abnormal price hike in the metal market during (2003). Under the aforesaid situations BTA faced shortage of working capital. High interest rate of finance from local banks in the one hand and cheaper finance of the foreign competitors on the other hand put BTA into tight position during 2003 through 2006 and hence the Company incurred loss during that period. The Management of BTA worked hard and arranged some finance from the local stock market to help the company to turn around and recover its lost market. After that from 2007 till to date the Company is earning good profit every year and declaring good dividends to its shareholders.

The management of BTA, consists of entrepreneurs who have successfully set up few other companies like (1) Life insurance company, under the name- Sun life Insurance Company Limited (2) Real Estate Company under the name- Rahat Real Estate and Construction Limited; (3) Trading Company Under the Name - World Wide Enterprise Limited; and (4) Food & Beverage Company under the name Bangladesh Thai Food and Beverage Limited (BTFL) (5) BD Thai Cosmo Ltd. Sunlife is one of the leading life insurance Company of Bangladesh having more than 80 thousands people working for it. The management runs the business through 1500 offices though out the country.

The real estate business in Bangladesh is booming as a result the Aluminium profile business is also booming. At present the market size of aluminium profiles is of 2000 MT per month. Currently demand for thinner aluminium profiles (economy line) in the local market is rising. It is not cost effective for BTA to produce thinner aluminium profiles using its existing heavy press lines. The heavy press lines of BTA can produce thicker and wider aluminium profiles more efficiently. Using the small press line of BTA, it is producing thinner aluminium profiles in a limited scale and marketing under "Pristine aluminium brand. Thinner aluminium profiles from BTA house has huge market demand which currently BTA is unable to supply as per demand. Considering the market demand, we now feel the necessity of setting up new Extrusion and Anodization in line with other auxiliary handling equipment to meet the growing demand for thinner aluminium profiles in the market.

We expect basing on market survey that demand for wood texture aluminium profile will increase in the near future as well. BTA plans to set-up wood texture coating plant. Extruded aluminium profiles from the existing and new plants may be used for wood texture coating. These BTA products have export prospects as well.

Aluminium profiles are produced by using imported aluminium billets. At present there is no Hot-top aluminium billet casting facility in the country. We consider that setting up hot-top aluminium billet casting plant will be a backward linkage of the existing extrusion plant ensuring 100% import substitution with good value addition in the country. Partial output of aluminium billet casting plant, about 500 MT per month, will be consumed by BTA extrusion plant and the rest will be sold to other extruders in the local market. As the local extruders will get quality billets from the local source as import substitute and they will not require importing billets. Our information is that, they are interested to buy aluminium billets from BTA, if available. Aluminium billets have export prospect as well.

Aluminium panel is a construction material. It is used as wall panel which increase the beauty and durability of the building. This product can be marketed through the existing distribution channels of Bangladesh Thai Aluminium Ltd (BTA). These panels may be manufactured in the same factory premises of BTA. This will increase the revenue of BTA.

PRODUCT DIVERSIFICATION:

Considering the above market condition BTA plans to set-up the following plants:

- 1) Extrusion Press.
- 2) Anodization Plant.
- 3) Casting Plant.
- 4) Electrical hard ware goods Items.

**AUDITORS' REPORT TO THE SHAREHOLDERS
OF
BANGLADESH THAI ALUMINIUM LIMITED**

We have audited the accompanying Statement of Financial Position of **BANGLADESH THAI ALUMINIUM LIMITED** as on June 30, 2015 and the related Statement of profit or loss account and other Comprehensive Income, Statement of Cash Flows and Statement of Changes in Equity together with related notes for the period ended 30 June 2015. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Scope

We conducted our audit in accordance with Bangladesh Standards on Auditing (BSA). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

Opinion

In our opinion, the financial statements prepared in accordance with Bangladesh Accounting Standards (BASs)/ Bangladesh Financial Reporting Standards (BFRSs), give a true and fair view of the state of the Company's affairs as of June 30, 2015 and of the results of its operations and its cash flows for the half-year then ended and comply with the applicable sections of the Companies Act, 1994; the Securities and Exchange Rules, 1987; and other applicable laws and regulations.

We also report that:

- a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit and made due verification thereof,
- b) In our opinion, proper books of account as required by the law have been kept by the company so far as it appeared from our examination of those books and (where applicable) proper return adequate for the purpose of our audit.
- c) The Company's Statement of Financial Position and Statement of Comprehensive Income dealt with by the report are in agreement with the books of accounts, read in conjunction with the annexed notes and related schedules attached.
- d) The expenditure incurred was for the Company's business.
